

Making a *difference*

Founded in 2005, Myeloma Canada is the only national charitable organization dedicated to addressing the holistic needs of people impacted by multiple myeloma. As a patient-focused organization, it drives progress across the care and research ecosystem by connecting, aligning, and fostering collaboration among patients, care partners, clinicians, researchers, governments, and industry to improve lives, increase access to optimal care, and advance research toward a cure.

Myeloma Canada delivers tangible impact through awareness initiatives, evidence-based education, resource and empowerment programs, focused advocacy, and support of patient-prioritized research.

Guided by its vision of a life uninterrupted by myeloma, Myeloma Canada is committed to ensuring that no one faces this blood cancer alone.

We're here for *you*

whenever you need

Our mission

To improve the lives of and empower all Canadians affected by myeloma and accelerate access to the best care while supporting the pursuit of its cure and prevention.

Our vision

A life uninterrupted by myeloma.

MAKING MYELOMA MATTER

Living with myeloma

You're not alone.

Trusted information, practical support, and a connected community for people living with myeloma, their care partners, and families.

myeloma.ca

What is *multiple myeloma?*

Multiple myeloma (or myeloma) is a type of blood cancer that starts in the bone marrow, where blood cells are made.

Myeloma can affect different parts of the body by damaging bones, weakening the immune system, reducing healthy blood cells, and affecting kidney function.

Hope for the future

While myeloma is not yet considered widely curable, today's treatments are helping many people live longer and better than ever before. Advances in research, including immunotherapies and other innovative treatments, are leading to better and longer-lasting responses, giving more people years of disease control and improved quality of life. As research continues to advance quickly, hope for the future grows.

Information and Support When You Need It

A myeloma diagnosis often comes with questions, uncertainty, and important decisions. Myeloma Canada is here to help you understand your options, make informed decisions, and navigate life with myeloma.

Our resources include:

- trusted information
- informational webinars and events
- practical support tools and educational publications
- information about treatment options
- drug access information
- clinical trial navigation
- resources on living well with myeloma

Whether you're newly diagnosed, living with myeloma, supporting a loved one, or exploring treatment options, we're here to help every step of the way.

Connect with Others

Connecting with people who understand the realities of myeloma can provide reassurance, practical advice, and a sense of community.

Opportunities to connect

- Join one of the 45+ local support groups.
- Connect with others on MC Lounge, a secure virtual discussion space.
- Speak with a Myeloma Information Specialist through our MC Assistance InfoLine.
- Take part in an in-person educational InfoConference.
- Participate in a community initiative.

Because no one should face myeloma alone.

Learn about research and advocacy

Discover how Myeloma Canada is working to advance myeloma research and improve care for people living with myeloma.

Science & research: Through our Aurelia Initiative, we support patient-prioritized research programs to accelerate innovation and bring new treatments to patients faster.

Advocacy: We work to improve access to better care, new treatments, and innovations for people living with myeloma, no matter where they live in Canada.

Get involved

From sharing your voice to participating in research programs and advocacy campaigns, you can help shape the future of myeloma care.
